Is the solution to a high rate of accidents to train more people in first aid?

... looking for the cause ...

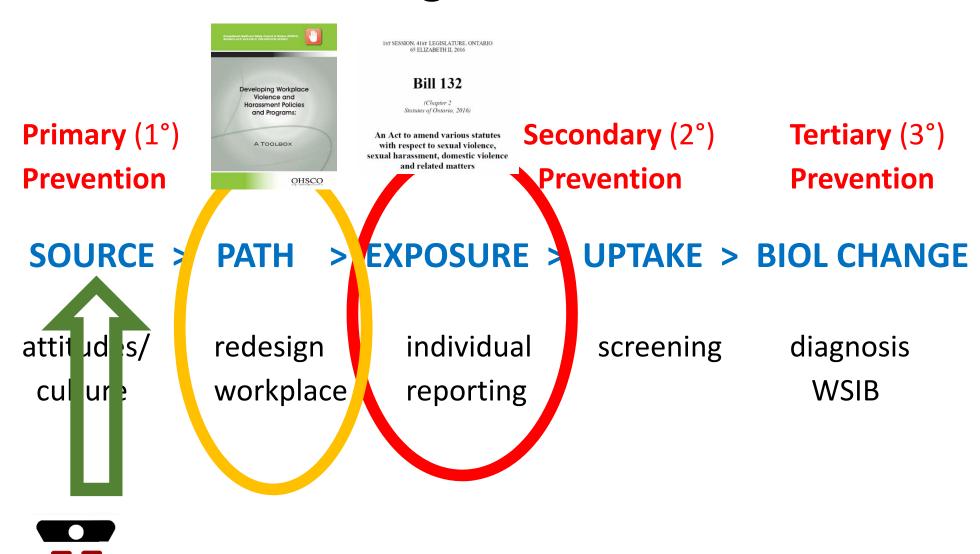

## Bill 132 (168)

- "Expert witness Dr. Peter Jaffe testified at the Dupont inquest about "84 missed opportunities" for preventative intervention as the harassment towards Ms. Dupont escalated in gravity and frequency."
- "During the inquest into Lori Dupont's case, we learned she repeatedly shunned help or attention to her situation."
- "While it is apparent the government sought, with these amendments and Code, to expeditiously protect sexual harassment victims, this legislation may instead be conducive to an opposite effect, isolating workers from wellestablished supports and placing too much onus on them to independently drive and trust someone else's process."

**Complaint-driven** vs. **Hazard-based**

## Workplace Stress Concerns:

- SPR Survey of Ontario JH&SC's (1980's)
- USW HS&E Conferences (list of top issues)
- Section 13 (4) & (5) of WSIA denies compensation for chronic stress (Bill 127)
- Annalee Yassi et al. (2013) systematic literature review and "expert interviews"; concluded with 10 items that strengthen the effectiveness of the JH&SC:
  - 2) scope of the committee (i.e., including issues such as harassment and other mental health issues, not just safety issues);

#### **Economic Burden:**

- "10 to 25% of Canadian workplaces effectively mentally injurious – not good for the mental health of their employees" ... "leading cause of short-term disability and long tern disability – it's the biggest single reason people are off work for periods of time"
- "estimated at \$51-billion" ... " up substantially over the past decade" (\$20-billion direct costs)

**Speech of the Honourable Michael Kirby** 

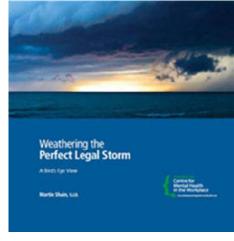

# Tracking the Perfect Legal Storm (Shain, 2010, [Weathering the ..., 2014])

- Labour relations law
- Employment standards
- Human rights legislation
- Law of torts (negligence)
- OH&S law (violence & harassment)
- Workers' compensation changes (BC & Ont WSIAT)
- Awards up 700% over that last 5 years

... legal opinion (22/10/2013) that CSA standard sets the legal criteria for a psychologically safe system of work

... no specific legislation ...

## EU Directive 89/391/EEC

- 2. The employer shall implement the measures referred to in the first subparagraph of paragraph 1 on the basis of the following general principles of prevention:
  - (g) developing a coherent overall prevention policy which covers technology, organization of work, working conditions, social relationships and the influence of factors related to the working environment;

#### **EU Context**

- European Framework Directive on Health and Safety at Work (89/391/EEC), which came into force on January 1<sup>st</sup> 1993 was interpreted as including psychosocial risks in workplace risk assessment
- European Parliament's Resolution A4-0050/99 (February 25, 1999) specified the goals of workplace well-being to include psychosocial aspects
- These were generic requirements (i.e. "assess risks including psychosocial") without specific performance evaluations (similar to our current state of affairs with violence & harassment policies) and were largely ignored or only paid lip-service to
- Within the last 5-10 years EU members have been passing very specific regulations requirement the measurement of psychosocial hazards and some even so far as requiring the quantitative demonstration of the effect of interventions

 EU 2012 enforcement "blitz" on psychosocial risk assessment

- "Work-related stress describes the physical, mental, emotional and behavioural reactions of employees who perceive that their work demands exceed their abilities and/or resources to cope and do their work."
- "Work-related mental injury resulting in psychological harm is the second most common cause of workers' compensation claims in Australia, after manual handling. It currently accounts for 11 per cent of workers' compensation claims in Victoria, and one of the leading causes is work-related stress."

http://www.worksafe.vic.gov.au/safety-and-prevention/health-and-safety-topics/work-related-stress

## Legal Evolution in Canada

COMMENTARY

Access to Workers' Compensation Benefits and Other Legal Protections for Work-related Mental Health Problems: A Canadian Overview

Katherine Lippel, LL.L., LL.M., Anette Sikka, BA, LL.B.<sup>2</sup>

#### **ABSTRACT**

This article reports on a study of the legal and policy framework governing access, in Canada, to workers' compensation benefits for workers who are work disabled because of mental health problems attributed to stressful working conditions and events. It also provides a brief description of legislation regulating psychological harassment in Quebec and Saskatchewan.

Applying classic legal methodology, the article examines the legal situation in Canada, relying on federal and provincial legislation and case law. While many of the jurisdictions studied explicitly restrict compensability to the consequences of traumatic incidents, application of this legislation is very different from one province to the next. In some provinces, legal exclusions are applied emphatically, whereas in others the workers' compensation appeal tribunals interpret the legislative exclusions much more narrowly, allowing for some access to compensation despite the legislative exclusions. Other provinces have no such exclusions and accept claims for both acute and chronic stress, although access to compensation remains more difficult for claimants with mental health problems than for those who are physically injured, regardless of where they live.

The article concludes by offering an analysis of the consequences of the current situation from a public policy and public health perspective, notably underlining the negative consequences, particularly for women, of current workers' compensation policy in most Canadian provinces.

Key words: Workers' compensation; psychosocial risk factors; mental health problems; psychological harassment; legislation

La traduction du résumé se trouve à la fin de l'article.

Can | Public Health 2010;101(Suppl.1):S16-S22.

## Bill 127 (April 27, 2017)

**Bill 127** 

An Act to implement Budget measures and to enact, amend and repeal various statutes

## Subsections 13 (4) and (5) of the *Workplace Safety and Insurance Act, 1997* are repealed and the following substituted:

#### **Mental stress**

(4) Subject to subsection (5), a worker is entitled to benefits under the insurance plan for chronic or traumatic mental stress arising out of and in the course of the worker's employment.

#### Same, exception

(5) A worker is not entitled to benefits for mental stress caused by decisions or actions of the worker's employer relating to the worker's employment, including a decision to change the work to be performed or the working conditions, to discipline the worker or to terminate the employment.

### Now, how about the OHS Act?

 Lawyers at the MOL are of the opinion that mental health is not covered by the "general duty clause" "take every precaution reasonable in the circumstances for

the <u>protection of a worker</u>." [clause 25(2)(h)]

- ... let alone anywhere else the OHS Act ... (with the possible exception of Bill 132 (168) and harassment with respect to which, the lawyers are wondering if the MOL over-stepped its jurisdiction)
- What would a charter challenge of this interpretation rule?

# What the MOL can do to help (Oct 24 2013 meeting):

- Recognize that workplace psychosocial hazards are covered by 25(2)(a)&(h) and 4.1(2) that related orders may be issued for specific violations
- 2. Publish a guide for workplaces to identify their responsibility, refer them to available standards and tools
- 3. Blitz office work environments, healthcare, retail for psychosocial hazards (use EU tools)

# Mental Injuries Tool (MIT) Group:

- The Mental Injuries Tool group was established in **2009** out of a stakeholder sub-committee of worker representatives and the Occupational Health Clinics for Ontario Workers who were charged with "supporting worker representatives in taking action on prevention and workers' compensation".
- This sub-committee held a workshop in 2010 to select projects which could be developed jointly to address common concerns. The topic which received the most interest was mental injuries (workplace psychosocial risk factors; recognition & compensation for mental injuries).

## MIT group - who's involved:

- Laura Lozanski, CAUT
- Terri Aversa, OPSEU (Chairperson)
- Sari Sairanen, UNIFOR
- David Chezzi, Andréane Chénier, CUPE
- Nancy Johnson, Erna Bujna, ONA
- Valence Young, ETFO
- Gerry LeBlanc, Sylvia Boyce, USW
- Chris Watson, Mary Shaw , UFCW 175/633
- Jane Ste. Marie, John Watson, OSSTF
- Kathy Yamich, Workers United Union
- Charlene Theodore, OECTA
- Sophia Berolo, University of Waterloo
- Ashley McCulloch, Carleton University
- Andy King, LOARC (Labour, OHCOW, Academic Research Collaboration)
- Maryth Yachnin, IAVGO
- Alec Farquhar, Kristen Lindsay, OWA
- Patricia Phillips, Tracey Feener-Snow, Chelsie Desrochers, André Gauvin, Mike Sonne, Ted Haines, Valerie Wolfe, John Oudyk (OHCOW)

## History:

- In **February 2011** members of the working group and other interested people attended a workshop which reviewed the **theories** behind common psychosocial measurement tools.
- Based on these deliberations, the group decided to administer the Copenhagen Psychosocial Questionnaire (COPSOQ) and agreed to pilot test the survey at upcoming union conferences.

### Copenhagen Psychosocial Questionnaire

(COPSOQ II Short version)

http://www.arbejdsmiljoforskning.dk/Sp%C3%B8rgeskemaer/Psykisk%20arbejdsmilj%C3%B8.aspx?lang=en

# COPSOQ II Psychosocial Hazards:

#### Demands

- Quantitative demands—not having enough time
- Work pace—having to work at a high pace
- Emotional demands—work that involves emotional investment

#### **Work Organization**

- Influence—having influence over your work
- Possibilities of development able to learn new things, take initiative
- Meaning of work—feeling that your work is important and meaningful

 Commitment—feeling that your workplace makes a positive contribution

#### Relationship

- Predictability—being kept well informed, having enough information
- Recognition being appreciated and treated fairly
- Role clarity—knowing what is expected and having clear objectives
- Leadership—supervisor has planning skills, values your job satisfaction
- Supervisor support—your supervisor listens and helps

#### **Work Values**

- Trust—information from management is trustworthy; management trusts workers
- Justice and respect—conflicts resolved fairly, work distributed fairly

#### Work/Life Balance

- job satisfaction
- · Work/life conflict

#### Offensive Behaviours

 Undesired sexual attention, threats of violence, physical violence, bullying

Kristensen, T. S. et al. 2005. Scandinavian Journal of Work and Environmental Health 31(6), 438-49.

June 2014

# Pilot testing:

**USW** HS&E Conference, Vancouver, April 2011 (210 attendees) 159 responses (76%)

**OPSEU** BPS Conference, Toronto, June 2011 (180 attendees) 153 respondents (85%)

CAW Women's Conference, Port Elgin,

August 2011 (160 attendees) 160

respondents (100%)

## History:

- The results of these trial administrations were presented at the Labour, OHCOW, Academic Research Collaboration (LOARC) Teach-in called "Stopping the spread of psychosocial hazards at work in Quebec and Ontario - A Teach-in" held in Ottawa October 24/25 2011 (<a href="http://www.opseu.org/hands/teachin\_3/6%20Oudyk%20en.pdf">http://www.opseu.org/hands/teachin\_3/6%20Oudyk%20en.pdf</a>).
- Based on these trials we agreed that the COPSOQ was a useful tool to use and additional questions were added
- The MIT group developed a guidebook and other tools to address all aspects of stress in the workplace (launch E-Dome, Sudbury, October 10, 2012)

## Progress to date

- evaluated 90+ workplaces (8300+ surveys) and 8 union conferences (almost 1400 surveys)
- about 54 workplaces were due to a single union campaign (2013)
- 4100+ respondents to a cross-Canada poll (2016)
- total of almost 14,000 survey responses to date
- 3 workplaces have done repeat surveys
- 2 workplaces and the cross-Canada poll have used the new COPSOQ III questions

## History:

- 1997 COPSOQ I
- 2003 COPSOQ II
- 2017/18 COPSOQ III (to be released next year?)
- all materials including validation data provided free of charge and are available online
- International Network of users (academics, private consultants, activists)
- three versions: CORE (shortest essential elements of all COPSOQ surveys); MIDDLE (for consultants' use); and LONG (for research purposes)
- 1<sup>st</sup> International COPSOQ Workshop (2007 in Copenhagen), and since then every two years (2015 in Paris: 50+ participants from 16 countries); 2017 in Santiago Chile.

## Theoretical Framework:

- The intent was to create an instrument that measured psychosocial risk factors by covering the important dimensions of the seven theories of workplace stress:
  - 1. The job characteristics model (JCM)
  - 2. The Michigan organization stress (MOS) model
  - 3. The job demands—control model (DC)
  - 4. The sociotechnical (ST) approach
  - 5. The action-theoretical (AT) approach
  - 6. The effort-reward imbalance (ERI) model
  - 7. The vitamin model (VM)
  - 8. also absorbed other models such as Organizational Justice, over the yrs
  - 9. recently demonstrated that elements are also consistent with the Job Demands Resources (JD-R) model

## COPSOQ III content changes

New items moved/added to CORE (formerly SHORT) version:

- role conflict ("illegitimate task")
  - Do you sometimes have to do things which ought to have been done in a different way?
  - Do you sometimes have to do things which seem to be unnecessary? – actually from MIDDLE version
- social support from colleagues
- sense of community at work
- insecurity over employment
- insecurity over working conditions
- "double presence"
  - Are there times when you need to be at work and at home at the same time?

### Danish reference data:

- While the Danes are often classified as one of the "happiest" people in the world (making them an ideal reference population), Canadian workplaces have often complained about not having Canadian reference data
- We attended the 5th International COPSOQ Workshop Paris (Oct 6-9, 2015)
- They were in the process of developing COPSOQ III and looking for people in each participating country to establish reference data

### Methods:

- In conjunction with a recognized Canadian polling organization, an online survey was completed between February and March 2016.
- Selection criteria were any employed Canadian working in a workplace with more than 5 employees.
- Survey was made available in English & French
- Originally the sample began with just Ontario but was later expanded to all of Canada
- EKOS provided weighting factors to adjust to the Census

## Results:

# Colour scheme:

- Scores for each scale were divided by economic sector
- For each scale the Excel default gradient colouring was used which assigns green to sector with the best score and red to the sector with the worst score and the median being yellow
- Each scale was "coloured" independently of the other scales

- Stress leave/burnout (n=14, 1.70)

N=69, 8.40%

#### Comments ...

"It is a good place, management can be harsh at times but it is fun."

"I work for an amazing organization that does great work. the workload for managers is off the chart - there is great appreciation however, the work can't be completed in a regular work day."

"most of my dissatisfaction comes from my manager. If he wasn't the manager, the answers to the questions would be quite different. In the past, with different managers, I have had quite high job satisfaction."

"Highly stressful, work overload, no clarity in role and responsibility leads to duplication between corporate branches, bullying, no support from management, always worried about loosing the job and unable to find another one and not yet eligible for pension."

# ... try it on our app ...

 In partnership with the CCOHS, we've created an app that allows you to do the survey and have your own personal score

http://www.ohcow.on.ca/MITApp

#### **Workplace Stress**

#### **OPEN ALL ACTION PLAN** LEARN · familiarize yourself with the basics deepen your understanding, share your awareness · identify resources Follow these steps to initiate change in your workplace **ORGANIZE** · you can't do it alone, get support/buy-in, establish a working group · recognize the readiness for change in your workplace · raise awareness & commitment, this is a process not a quick fix ASSESS CHANGE **EVALUATE** Contact OHCOW to learn more about a customized workplace assessment. >>> More

# Let's try it out ...

 Self-scoring version or the app (the app has suggestions)

Terri's case studies

• IHSA repeat survey experience (Ken Rayner)

## Finding solutions to your problems ...

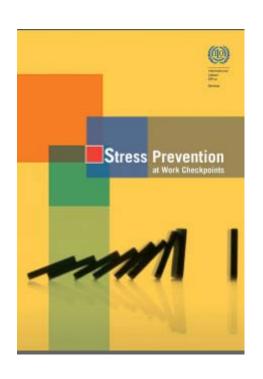

- Pick a psychosocial risk factors you'd like to address
- Refer to resources (plenty online) and don't be afraid to ask for help
- Best not to work alone but with a representative steering committee
- "let the conversation begin ..."

# International Labour Organization (ILO) Stress Prevention Guidebook:

- checkpoint format
- lists specific hazards
- identifies prevention strategies

## ILO Checkpoint example

#### **CHECKPOINT 6**

 Adjust the total workload (quantitative demands) taking into account the number and capacity of workers.

#### **HOW**

- 1. Assess individual and team workloads through observation and discussion with workers to determine whether change is necessary and feasible.
- 2. Reduce unnecessary tasks such as control operations, writing reports, filling in forms or registration work.

3. ...

## e.g. Hospital Guidance tool

- High emotional demands prevention activities:
  - Feedback, coaching and acknowledgement from colleagues and managers
  - Specific objectives for work (when is the work result good enough/success criteria?)
  - Consensus and practice with regard to care and treatment
  - Overlap/transfer for shift changes
  - Possibility of withdrawing (a place for privacy)

## Try it out ...

- Gather a few people around you and pick one of the psychosocial factors
- Explain why this factor is important to you
- Together brainstorm some ideas on how you might address that issue both individually and organizationally

# Are You Ready to Do It? Stages of Change

- Pre-contemplation (Not Ready) "what problem? That's just the way things are in this line of work – always has been, always will."
- Contemplation (Getting Ready) "maybe things could change but I don't know if I'm prepared to change? It is easier though, just going along with things the way they are, but maybe ...??"
- Preparation (Ready) "things could be better and I think it's worth the effort to try – let's get together and figure out how to do something about this ..."
- Action "we're going to make the following changes and hope things will improve – I'm glad we're finally doing something about this!"
- Maintenance "so, we've made the changes, they might need a bit of tweaking, but I think this is going to work out in the long run"

# CSA Key Drivers + (carrots and sticks):

- 1. Costs/Savings (\$51 billion)
- 2. Risk (do you want to read about your workplace in the newspaper?)
- 3. Legal liability (Martin Shain's work)
- 4. Worker retention and recruitment (good place to work)
- 5. Excellence and sustainability
- 6. The right thing to do:

"law is the conscience of those who have none" (James Ham, 1983 IAPA Conference)

# Thank you!
